## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-30 and 81-84, drawn to a multi-mode electromagnetic radiation emitting device, comprising an emission module having at least one electromagnetic radiation emitting source, a first terminal, a second terminal and a polarity responsive controller interposed between said electromagnetic radiation emitting sources and said first and second terminals are classified in Class 250, subclass 493.1.

II. Claims 31-80, drawn to a switch mechanism for providing selectable switched circuit connections, comprising a plurality of spaced contact pads mounted on a support arranged for relative displacement, are classified in Class 315, subclass 136.

III. Claims 85-92, drawn to a power supply for supplying DC power to an electronic circuit comprising a microcontroller, the supply comprising a DC power source, a power conversion circuit, and a polarity switch, are classified in Class 323, subclass 265.

Inventions Group I, Group II, and Group III, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, Group I has separate utility such as being a general device for emitting electromagnetic radiation in the visible or infra-red range of the spectrum. Group II has separate utility such as being a switch mechanism for providing selectable switched circuit connections which can be utilized in various control circuits for operational systems in ion implantation. Group III has separate utility such as

Art Unit: 2881

being a general power supply for supplying DC power to electronic circuits involved in charged particle beam irradiation systems.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
